EDUCATION

PhD in Actuarial Science
2023 KU Leuven

MSc in Statistics
2019 KU Leuven

BSc/MSc in Psychology
2012/2014 KU Leuven

EXPERTISE

Risk & Modeling
- Insurance and reinsurance pricing
- Solvency II internal models
- Economic capital and multi-line portfolio risk aggregation

Pricing & Underwriting
- Exposure-based and experience-based pricing
- Generalized Linear Models (GLM) and Mixed Models (GLMM)
- Portfolio steering and pricing adequacy

Data & Automation
- R, Python, ReMetrica & SAS
- Model tooling
- Automation and reproducible workflows

Decision Support
- Model interpretation
- Challenge and innovate methodologies
- Stakeholder communication

Languages
- Proficient: English & Dutch
- Limited: French, German

RESEARCH

- Research Associate at KU Leuven and Imperial College
- Author and maintainer of the actuaRE and CalibrationCurves CRAN packages

ABOUT ME

Senior actuarial professional with **10+ years** of experience across insurance and reinsurance, specializing in **pricing, capital modelling, and portfolio analytics**. Combines strong **quantitative expertise** with a pragmatic, decision-oriented approach, enabling effective **communication** and alignment across technical and business stakeholders. Experienced in translating complex risk insights into **actionable input for pricing, underwriting, and strategic decisions** in an international environment.

WORK EXPERIENCE

Senior Quantitative Risk Specialist 10/2023 - Present
Ageas

- Drive development and implementation of **Solvency II internal models** for multi-line reinsurance, supporting capital, pricing, and portfolio steering decisions
- Provide **capital-driven insights** for reinsurance structuring, risk selection, and portfolio optimization
- Assess and enhance modelling methodologies, including development and validation of alternative approaches
- Lead **automation and tooling** for model execution, testing, and stakeholder reporting

Senior Actuarial Data Scientist 10/2019 - 10/2023
Belgian Insurance Company (confidential)

- Developed and deployed a **production pricing model** supporting premium setting, underwriting decisions, and portfolio steering
- Applied GLM/GLMM-based **exposure** and **experience rating** to improve loss cost modelling and risk segmentation
- Translated analytical results into **actionable insights** for pricing and underwriting stakeholders
- Owned model development, validation, and implementation, including reusable tooling

Actuarial Doctoral Researcher 10/2019 - 10/2023
Insurance Research Group - KU Leuven

- Developed **advanced actuarial pricing frameworks** combining credibility theory, GLMs, and mixed models, applied to real-world insurance portfolios (e.g., workers' compensation)
- Designed data-driven methods to incorporate and construct **hierarchical risk factors** into pricing frameworks
- Built reusable workflows and tools for **model development and validation** (incl. CRAN package)
- Communicated results to **technical and non-technical audiences**

Biostatistician 02/2015 - 09/2022
KU and UZ Leuven

- Statistical modeling across 20+ clinical and methodological research projects
- Led development of statistical tools and ensured robust data governance
